### Part III DETAILED ACTION

## Notice to Applicant(s)

1. This action is responsive to the following communications: amendment filed on 6/8/2005.

2. This application has been reconsidered. Claims 1-15 are pending.

# Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeda (U.S. 5,049,937) in view of Noguchi et al (Noguchi) (U.S. 6,290,322).

With respect to claims 1, 3, 8, 9, 14, and 15, Takeda discloses a printer (100) capable of having plural toners (5, 6, and 7) installed in a print engine; including a developer unit containing toner (column 2, lines 50-65); a switch settable to a state indicating a type of toner in the developer unit (column 2, lines 50-65), and means for detecting the setting of the switch and thereby detecting the type of toner contained in the developer unit (column 2, lines 50-65 and column 7, lines 25-35).

Takeda differs from claims 1, 3, 8, 9, 14, and 15 in that he does not clearly disclose a communication path connectable to a feedback link extending from the printer to a supporting data processor.

Application/Control Number: 09/912,378 Page 3

Art Unit: 2626

Noguchi discloses an image recording method comprising a feedback link from the printer to a data processor (20) (figure 1). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Takeda to include a feedback link from the printer to a data processor. It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Takeda by the teaching of Noguchi in order to improve the control of the system.

With regard to claim 2, Noguchi discloses an AFCCU (which reads on the CPU) (11, figure 1).

With respect to claims 4 and 10, Takeda discloses enabling and disabling the developer (column 7, lines 17-57).

With regard to claims 5 and 11, Takeda discloses the switch is attached to the developer (column 2, lines 53-68).

With respect to claims 6, 7, 12, and 13, Noguchi discloses limiting user access to the switch (the switch can only be selected from the operating panel or the computer) (column 3, lines 33-40 and column 7, lines 28-32).

### Response to Arguments

5. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

#### Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark E. Wallerson whose telephone number is (571) 272-7470. The examiner can normally be reached on Monday-Friday - 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kimberly Williams can be reached on (571) 272-7471. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
